John Sterling

Sliding Door Hardware

The John Sterling™ Sliding Door Hardware products offer a complete line of hardware for interior sliding Bi-Fold doors, By-Pass doors, Pocket doors and Pocket doors with frame kits. Having been in the market for over 60 years, our Sliding Door Hardware program features a broad range of size and weight options.

The buyers, builders and do-it-yourself customers will find everything they need for Sliding Door Hardware, including the finest customer service team in the industry.

The John Sterling™ name means quality and innovation, with products that are designed and built to last a lifetime. We deliver superior products at an exceptional value.

Bi-Fold Sliding Door Hardware

A Bi-Fold door is a door unit that folds in pairs. Bi-Folds are most commonly used for closets, but may also be used as sliding doors between rooms.

By-Pass Sliding Door Hardware

A By-Pass door is a sliding door unit that has two or more sections. The doors can slide in either direction sliding past each other. By-Pass doors are most commonly used in closets, in order to access one side of the closet at a time. The doors in a By-Pass unit will overlap slightly when viewed from the front, in order not to have a visible gap between them.

Pocket Sliding Door Hardware

A Pocket door is a sliding door that disappears, when fully open, between two wall panels in the adjacent wall.

Bi-Fold Sliding Door Hardware

Bi-Fold doors are applicable in a broad range of environments from pantries, laundries and closets.
