

Dishwasher: 2nd & 3rd Rack Solutions

Market Need:

- Low profile sliding system that operates smoothly and quietly, provides full access to rack contents, is corrosion resistant and does not trap food particles.

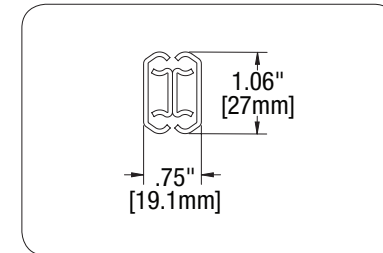

Design Challenges:

- Materials to withstand heat and humidity and be corrosion resistant
- Smooth, quiet operation
- Durability to support intended operation
- Secure hardware attachment methods
- Full access to drawer contents

KV Solution:

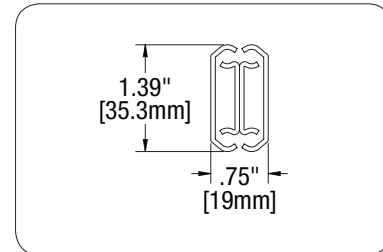

Features incorporated into dishwasher slides include:

- Stainless Steel (304, 430 grade)
- Drainage holes to effectively drain food particles
- Precision roll forming & ball-bearing technology
- Hold In detents
- Slide travel from full to over travel
- Key-hole attachment features
- Anti-corrosive finishing
- RoHS compliant

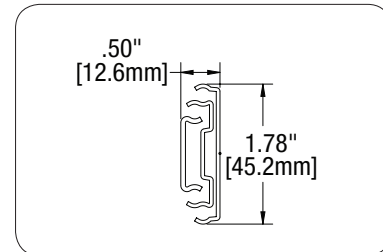

- 27mm (1.06") tall
- 19.1mm (.75") wide
- 3 member over-travel extension
