

## Seat Cushion Extender

- Market Need – Adjustable seat cushion extender for user comfort.
- Design Challenges – Ease of installation, slide effort, and structural integrity.
- Solution – Sliding system that allows the user to move the seat cushion to the desired location for added comfort.

Slide features incorporated into designs like this include:

- PEM studs for attachment
- Internal and external reinforcement for added structural integrity
- Standard, medium and high effort lubricant for target effort force
- Black or Zinc finish

- 35mm (1.38") tall
- 2 member partial extension
- 14mm (.55") wide
