Two-Tiered Drawer Organizer

Installation Instructions

Inspect all parts and read all instructions prior to beginning assembly and installation.

Parts Included

- A. Tray Assembly
- B. (2) #8x1/2" woodscrews

Tools Required

- Phillips screwdriver
- Pliers or 5/16 wrench
- Straight edge
- Utility knife
- Sabre saw or coping saw
- Table saw (optional)

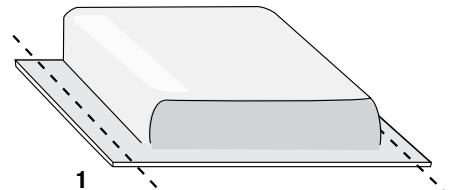

Product Assemblies

2075

- Step 1** Measure interior width of drawer and subtract 1/16" from this dimension. Invert bottom tray and mark equal cuts from each wing to the dimension above. Cutting can be done with a straight edge and utility knife. Care should be taken to make parallel cuts from each wing.

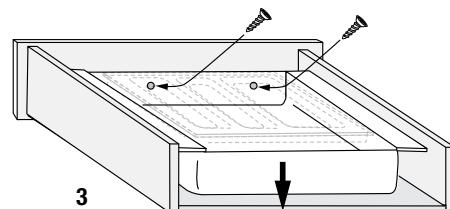

Optional step: cutting can be done on a table saw.

- Step 2** Remove drawer from cabinet. Using a sabre saw and eye protection, remove the top portion of the back of the cabinet drawer so that it is no more than 1" high.

- Step 3** Place lower tray inside the drawer. Attach the lower tray to the drawer using the two screws provided. Place the top tier into the lower tray and replace the drawer into the cabinet opening.

Clearance Notes:

Tray Length: It is permissible for the front-to-back length of the tray to extend beyond the lowered back of the drawer, therefore making use of the void space between the drawer and the cabinet back. It is possible to trim the length of the lower tray from 19-1/4" to 18-3/8" if necessary.

Drawer Height: In the event that the sides of the drawer are less than 3" high, it is permissible for the side wings of the lower tray to sit above the drawer sides.

Drawer Width: In the event that the interior drawer width is wider than the insert, it is recommended that the insert be installed either to the far right or left, and a permanent front to-back drawer partition be positioned against the open insert side, creating another storage pocket.

Step 1 Measure inside dimensions of the drawer into which the insert will fit. Subtract 1/16" from the width and depth.

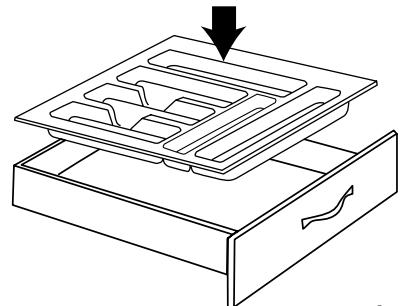

step 1

Step 2 Transfer the dimensions to the insert. Trim length and depth, cutting at a low angle. Smooth any rough edges by using sandpaper along the edges.

step 2

Step 3 Place insert in drawer. Installation is now complete.

step 3

NOTICE DE MONTAGE

Plateau range-vaisselle et utilitaire

Inspectez toutes les pièces et lisez toutes les instructions avant de procéder à l'assemblage et à l'installation.

Étape 1

Mesurez les dimensions internes du tiroir dans lequel l'insert va être introduit. Soustrayez 1,6 mm (1/16 in.) en largeur et en profondeur.

Étape 2

Transférez les dimensions sur l'insert. Rognez la longueur et la profondeur à l'aide d'une scie égoïne à dents fines et découpez selon un angle faible. Polissez les aspérités au papier de verre le long des bords.

Étape 3

Placez l'insert dans le tiroir. L'installation est terminée.

INSTRUCCIONES DE INSTALACIÓN

Bandeja para servicio de mesa y utensilios

Inspeccione todas las piezas y lea todas las instrucciones antes de comenzar con el armado y la instalación.

Paso 1

Mida las dimensiones interiores de la gaveta a la cual se acomodará la bandeja. Reste 0.16 cm. de la suma del ancho y de la profundidad.

Paso 2

Transfiera las dimensiones al organizador. Corte los lados del largo y de la profundidad usando una sierra de mano fina y cortándola a un ángulo pequeño. Alise los bordes ásperos usando papel de lija por las orillas.

Paso 3

Coloque la bandeja en la gaveta. La instalación en este punto está completa.
